DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 10 and 21 – 30, drawn to an endoscope imaging means means, classified in class 348, subclass 65.
- II. Claims 11 - 13, drawn to endoscope with associated digital signal processing and compression means, classified in class 375, subclass 240.26.
- III. Claims 14 – 20, drawn to endoscope imaging means with plurality of adjustment means, video properties and light and white balance adjusting, classified in class 348, subclass 655.

2. The Inventions I, II, III, are distinct each from the other because of the following:

3. Inventions I, II and III are related as combinations useable together. Invention of group one drawn to an endoscope imaging, however group II mostly drawn to compression of the digital image and group III are mostly related to controlling and adjusting video properties based on a preset/adjustment values. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed, because all the limitations as required in claims 1 – 10 of

Group I can be accomplished without the means and/or function of the other inventions as recited in other Groups, thus they are separately usable. .

4. Because these inventions are distinct for the reason given above and the search required for group I is not required for group II or III, restriction for examination purpose as indicated is proper.
